<input checked="" type="checkbox"/>	<a href="#">JP07055073A2</a>	<b>PIPE JOINT</b> PURPOSE: To provide a pipe joint capable of restraining fatigue destruction of the pipe caused by vibration. CONSTITUTION: A sleeve 9 is formed into an approximately cylindrical shape wherein the center part is formed into thick-walled, and the tip is inserted into a taper hole 2 of a joint main body 3. The rear end of the sleeve 9 is extended backward from the gap between a cap nut 6 and a pipe 7, so as to form a taper-like skirt part 14 whose diameter is shortened backwardly. A pair of axially extended slits are provided on this skirt part 14, and an annular groove 16 is provided on the inside diameter surface in the approximately center area of the skirt part 14.
